

Ladysmith Loop Pipeline Project

PROJECT DESCRIPTION

Robert B. Somerville constructed approximately 4.5 km of NPS 20 steel pipeline with a maximum operating pressure of 1,440 psig (9 930 kPa). The Ladysmith Loop starts at EGD's Tecumseh Station and is used to deliver and take away gas, in a normal operating pressure range of between 300 -1340 psig (2 070 to 9 240 kPa), to and from the Ladysmith storage reservoir. The project is part of the Tecumseth Storage Enhancement Project

Client

Enbridge Gas Distribution

Job Number

08012

Work Type

Mainline Pipeline

Location

Ontario

Role

General Contractor
