

PROJECT DESCRIPTION

This project required the relocation of 3300m of 16" pipeline for a highway overpass expansion in Fort McMurray, Alberta. The work was to be completed in two phases. Phase 1 was the installation of 2750m of 16" during the winter of 2012. Phase 2 was to be completed in the fall of 2012, with the remainder of the pipeline to be installed, tie-ins completed and existing pipeline between tie-ins was removed.
