

PROJECT DESCRIPTION

Project is to replace existing steel mains and services in the Aldergrove area of Edmonton. Area is primarily residential and small apartment complexes. Project involved installation of 7700m of PE mains ranging from 2" to 3", and 900 services. Also involved with the replacement of service lines was to move any existing inside gas meter to the outside of the building. Inside gas meter work consisted of primarily residential houses with 200 series meters, and commercial meters up to 2M rotary meters.
