

Enbridge Pipeline Integrity Digs - 2012 to 2015

**PROJECT DESCRIPTION**

Robert B. Somerville was contracted by Enbridge Pipelines to complete integrity digs on various diameter pipelines across Eastern and Western Canada. This work was extremely time sensitive, requiring extensive planning, scheduling and resources to ensure permit deadlines were met. Dig locations varied from cities to farm fields, sensitive wetlands and creeks. Somerville with their pipeline maintenance experience was an ideal candidate for this project.
