

Steel Mains Replacement (SMR) - Ormsby

**PROJECT DESCRIPTION**

Project is to replace existing steel mains and services in the Ormsby area of Edmonton. Area is primarily residential with some townhouses and condominiums and some commercial buildings. Project involves installation of 1,220m of PE mains up to 2", 1,200m of PE mains between 3" and 4", and 235 services. New mains and services will primarily be installed by directional drilling. Also involved with the replacement of service lines is to move any existing inside gas meter to the outside of the building. Inside gas meter work will consist of primarily residential houses with 200 series meters, and commercial meters up to 2M rotary meters.
