

TransCanada - NPS 48 Launcher Installation

**PROJECT DESCRIPTION**

This project involved the installation of a new 56 launcher on TransCanada's NPS 48" 400 series mainline at MLV 401 in Ile des Chenes, Manitoba. Work included expanding the existing station to incorporate the new piping modifications. Somerville was contracted to complete a full turn key installation from removals to final tie-ins and commissioning. Other activities included hydrovacating, excavation, piling, structural steel supports, piping installation, hydrotesting, bolt-ups, isolation, cold cuts, final tie-ins, coating, painting, backfill, gravel, platforms and fencing. Project was schedule driven to meet the planned outage dates. Overall project was completed on time and without incident.
