

PROJECT DESCRIPTION

Project included replacing existing steel mains and services in the Belgravia 2 area of Edmonton. Area is primarily residential and some commercial buildings. Project involved installation of 5,800m of PE mains up to 6" and 434 services. New mains and services were primarily installed by directional drilling. Also involved with the replacement of service lines was to move any existing inside gas meter to the outside of the building. Inside gas meter work consisted of primarily residential houses with 200 series meters, and some commercial rotary meters.
