

PROJECT DESCRIPTION

Project is to replace existing steel mains and services in the Highlands area of Edmonton. Area is primarily residential with a commercial building. Project involves installation of 1,100m of PE mains up to 2" and 78 services. New mains and services will primarily be installed by directional drilling. Also involved with the replacement of service lines is to move any existing inside gas meter to the outside of the building. Inside gas meter work will consist of primarily residential houses with 200 series meters, and a larger commercial meter.
