

Enbridge Pipeline Integrity Digs

PROJECT DESCRIPTION

Somerville has successfully worked with Enbridge Pipelines for several years to complete integrity digs on various diameter pipelines across Eastern and Western Canada. This work is typically time sensitive, requiring extensive planning, scheduling and resources to ensure permit deadlines are met. Dig locations vary from cities to farm fields, sensitive wetlands and creeks.

Client

Enbridge Pipelines

Job Number

20370D

Work Type

Integrity & Maintenance

Location

Across Canada

Role

General Contractor
