

## Enbridge - Maritimes NE Station Demolition

**PROJECT DESCRIPTION**

Somerville was contracted by Enbridge to demolish the station which tied the Encana Deep Panuke Pipeline into the Maritimes NE Pipeline, located in Goldboro Nova Scotia. The offshore gas well had reached its life expectancy and the station needed to be demolished. As part of the project, four (4) buildings, two (2) skids, multiple pipe manifolds and all electrical, cathodic and controls cabling were removed from site and disposed of. The intent of the project was to return the land to its previous condition removing all fencing and restoring the area to its natural condition.
