

PROJECT DESCRIPTION

Scope of work included installation of 8.7 km of 30" pipeline including 3 valve stations in East Calgary. This Urban Pipeline Replacement Project in 2015 was part 2 of 3 segments to replace aging infrastructure that currently runs within the City of Calgary. Execution of the work included 9 HDD sections totalling 4280m and 4420m of open cut.

For over fifty years, we have leveraged innovation to connect communities. We remain committed to responsibly construct a clean, sustainable future. Somerville builds the infrastructure that makes energy reliably flow; from generation to generation.
