

PROJECT DESCRIPTION

This project required the replacement of 1075m of 24" pipeline in an urban area. This presented challenges in that the pipeline needed to remain operational throughout the entire replacement. Stopple fittings and 24" bypasses were installed to ensure gas flow during construction activities.

For over fifty years, we have leveraged innovation to connect communities. We remain committed to responsibly construct a clean, sustainable future. Somerville builds the infrastructure that makes energy reliably flow; from generation to generation.

Job Number: 15 025

Role: General Contractor

Duration: August 17, 2015 to November 11, 2015

Value: \$ 7,000,000.00

Client: TransCanada

Client Contact:

Client Phone:

Client Email:

Owner: TransCanada Pipelines

Engineer:

Primary Work Type: Pipeline Construction

Other Work Type:
