

PROJECT DESCRIPTION

Installation of 16.7 km of 24" (610mm) pipeline including 4 valve stations in North East Calgary. This Urban Pipeline Replacement Project in 2015 was part 1 of 3 segments to replace aging infrastructure that currently runs within the City of Calgary. Execution of the work included 12 direction drill segments totalling 4855m and 11,901m of open cut.

For over sixty years, we have leveraged innovation to connect communities. We remain committed to responsibly construct a clean, sustainable future. Somerville builds the infrastructure that makes energy reliably flow; from generation to generation.

Job Number: 15021

Duration: July 1, 2015 to February 1, 2016

Client: ATCO Pipelines

Primary Work Type: pipeline
