

## PROJECT DESCRIPTION

The primary work involved rerouting a section of Enbridge Pipelines Line 9, from approximately KP 3081.35 to KP 3082.07 in Toronto, Ontario. This section of Line 9 is a 30 inch (762 mm) OD pipeline located on the southern edge of the Hydro One corridor between the Luton Gate and Pineway Blvd. This project involved Directional Drilling approximately 635m of pipe under the Don River within 0m to 5m of the existing line, cutting out approximately 70m compromised pipe and restoration of unstable soils along the river bank. Scope included the installation of 30" valve on Line 9 including actuator and controls.

For over fifty years, we have leveraged innovation to connect communities. We remain committed to responsibly construct a clean, sustainable future. Somerville builds the infrastructure that makes energy reliably flow; from generation to generation.

Job Number: 13022

Duration: September 1, 2013 to February 1, 2014

Client: Enbridge Pipelines

Owner: Enbridge Pipelines

Primary Work Type: Pipeline Installation

Other Work Type: Horizontal Directional Drilling
