

## PROJECT DESCRIPTION

This project requires the replacement of a 600 metre segment of the 12" pipeline under the Credit River in Mississauga, Ontario. This is a preventative measure to mitigate the changing river flow and its impact on the line. This pipeline portion is part of the SPPL line, supplying refined fuel products in the Mississauga and Greater Toronto Area, including a significant portion of product used at Toronto Pearson International Airport.

A critical component of this project is protection of the local environment, including water protection and safe decommissioning. Important to the project's success requires involvement with key stakeholders including: First Nations, City of Mississauga, Hydro One, Credit Valley Conservation Authority, Region of Peel and Sun-Canadian Pipelines.

The project involved the successful completion of drilling via HDD 602 metres of 12" NPS. The entire project is scheduled for completion in August 2019.

For over sixty years, we have leveraged innovation to connect communities. We remain committed to responsibly construct a clean, sustainable future. Somerville builds the infrastructure that makes energy reliably flow; from generation to generation.

Job Number: 19400

Duration: April 1, 2019 to August 1, 2019

Owner: Imperial Oil

Primary Work Type: Pipeline

Other Work Type: Horizontal Directional Drilling
