

PROJECT DESCRIPTION

Project is to replace existing steel mains and services in the Belmead area of Edmonton. Area is primarily residential and some commercial buildings. Project involves installation of 2,300m of PE mains up to 6" and 420 services. New mains and services will primarily be installed by directional drilling. Also involved with the replacement of service lines is to move any existing inside gas meter to the outside of the building. Inside gas meter work will consist of primarily residential houses with 200 series meters, and commercial meters up to 2M rotary meters.

For over sixty years, we have leveraged innovation to connect communities. We remain committed to responsibly construct a clean, sustainable future. Somerville builds the infrastructure that makes energy reliably flow; from generation to generation.
