

PROJECT DESCRIPTION

Project is to remove an existing 6" steel valve located in a vault, and install a new PE valve in a new location. Line will be isolated utilizing two 6" Mueller stopper fittings and one 8" Mueller stopper fitting. Work location is on Memorial Drive NE, in a busy intersection.

For over sixty years, we have leveraged innovation to connect communities. We remain committed to responsibly construct a clean, sustainable future. Somerville builds the infrastructure that makes energy reliably flow; from generation to generation.
