

PROJECT DESCRIPTION

Somerville has successfully worked with Enbridge Pipelines for several years to complete integrity digs on various diameter pipelines across Eastern and Western Canada. This work is typically time sensitive, requiring extensive planning, scheduling and resources to ensure permit deadlines are met. Dig locations vary from cities to farm fields, sensitive wetlands and creeks.

For over sixty years, we have leveraged innovation to connect communities. We remain committed to responsibly construct a clean, sustainable future. Somerville builds the infrastructure that makes energy reliably flow; from generation to generation.

Job Number: 20370 D
