

ATCO GAS PLASTIC MAINS REPLACEMENT PROGRAM (PMR) – LOS VILLAS

SOMERVILLE

PROJECT DESCRIPTION

Project is to replace existing plastic main and services in the rural area of Los Villas south east of Edmonton. This includes the abandonment, relocation, and installation of mains, services and meters, through trenchless installation including meter placement to an outside appropriate location. Includes exterior and interior piping, fittings, meters, regulators, coring and sealing of existing holes as required to relocate meter sets. Cleanup and restoration to take place to same or better condition. Area is primarily residential and involves installation of 6,090m of PE mains up to 2" and 26 services. New Mains and services will be primarily installed by directional drilling.

For over sixty years, we have leveraged innovation to connect communities. We remain committed to responsibly construct a clean, sustainable future. Somerville builds the infrastructure that makes energy reliably flow; from generation to generation.
