

PROJECT DESCRIPTION

The project involved the installation of 5 - 4" HDPE conduit under the Detroit River to Boblo Island. The drill length was approximately 500 meters and included drilling through rock. The contract also required the construction of pull pits, assisting with the installation of 3 hydro and 1 telephone cable.

Power on the island was supplemented by Diesel Standby Generator during the installation.

For over fifty years, we have leveraged innovation to connect communities. We remain committed to responsibly construct a clean, sustainable future. Somerville builds the infrastructure that makes energy reliably flow; from generation to generation.

Job Number: 08 354

Role: General Contractor
