

PROJECT DESCRIPTION

Scope of work included the installation of approximately 20km of new NPS 36 pipeline from Cromer Station and tie-in to the existing Line 3. Additionally, the completion of five (5) main crossings were required plus installation of one NPS 36 Main Block Valve assembly. Pipeline was constructed in an environmentally sensitive area that required special considerations for wetland crossings and in depth control measures to prevent the spread of noxious weeds.

For over fifty years, we have leveraged innovation to connect communities. We remain committed to responsibly construct a clean, sustainable future. Somerville builds the infrastructure that makes energy reliably flow; from generation to generation.

Job Number: 13028

Client: Enbridge Pipelines

Primary Work Type: Pipeline Construction
